SUMMARY

Final-year Communications & Electronics Engineering student and aspiring Infrastructure & Platform Engineer, with hands-on experience in AWS (IAM, EC2, S3) and a strong foundation in networking fundamentals through CCNA coursework. Focused on building secure, well-structured .cloud and network environments as a foundation for supporting production infrastructure

EDUCATION

New Damietta, Egypt	Horus University
Aug 2022 - Expected May 2027	Bachelor's Degree in Communications and Electronics Engineering
	Cumulative GPA: 3.08/4.0

PROJECTS

July 2026

AWS Cloud Infrastructure Task — IAM, EC2 & S3 *Self-Directed Cloud Project*

- Configured a dedicated IAM user, user group, and least-privilege permission policies to control account access.
- Built a custom IAM Role with a trust relationship between EC2 and S3, enabling the instance to access the S3 bucket securely without embedded access keys.
- Diagnosed and resolved an AssumeRole failure caused by an incorrectly scoped Principal in the trust policy, correcting the ARN to restore the IAM Role's cross-service access.

COURSES

Digital Egypt Pioneers Initiative (DEPI) - DevOps Track | In Progress

- Hands-on training in DevOps fundamentals, AWS cloud infrastructure, Linux, networking, and professional communication.

CCNA - Routing & Switching Fundamentals | Self-Study

SKILLS

- Technical Skills: Networking Fundamentals (Routing & Switching, VLANs, Subnetting, NAT, ACLs), Linux Fundamentals, AWS (IAM, EC2, S3)
- Tools: AWS Management Console
- Languages: Arabic (Native), English (Native)
